REAR LOWER SHOCK ABSORBER STONE GUARD COMPATIBLE WITH NISSAN NAVARA NP300

Blackhawk 4x4 stone guards are now available for the NP300 Navara. NP300 rear shocks mount to the front of the axle tube putting them in harm's way to piercing stones and other flying objects. Protect your expensive shocks with a pair of Australian made 304 Stainless Steel shock guards that bolt on with basic hand tools.

The standard lower shock mount suffers from fatigue due to its light weight construction and is prone to tearing off the axle tube, fitment of the Blackhawk 4x4 stone guards triangulate and strengthen the mount to share the load through additional points of the chassis.
