## STEERING FLIP ADAPTOR

COMPATIBLE WITH JK JEEP

JK JEEPS have their Draglink in a low and vulnerable position on the passenger side knuckle, if wheeling in any rough terrain they run a very high risk of damage causing steering failure, or at best premature wear due to side impact of the rod/tie rod end.

This flip adaptor machined from Stainless Steel billet allows you to re-drill the steering knuckle to move the draglink to the top of the knuckle. Drilling with a 7/8th drill bit (not supplied) will allow you to press in the new S/S Flip adaptor and mount the draglink from the top of the knuckle providing considerably more clearance keeping the steering arm out of harm's way.

Designed with a CNC machined tolerance fit and leading shoulder to ensure a firm quality fit to the OE steering knuckle.

**STAINLESS STEEL BILLET**

**CONSIDERABLY MORE CLEARANCE**

**DESIGNED WITH A CNC MACHINED TOLERANCE FIT  
AND LEADING SHOULDER**

**FIRM QUALITY FIT TO THE OE STEERING KNUCKLE**

**PART NUMBER SB050  
BARCODE 9319478608191**
