## UPPER CONTROL ARM

**COMPATIBLE WITH NISSAN NAVARA NP300/D23 2015+**

The Blackhawk 4x4 UCA for the Navara NP300/D23 with lifts of 25-75mm would be one of the best-known aftermarket UCAs on the market when it comes to fixing the impact on steering kinematics that a lift kit induces.

Its design is to be better than original equipment producing more caster than the factory figure. Providing a much better driving experience and steering feel. With thanks to the 6mm wall thickness of the DOM tube and Roadsafe-manufactured hi-angle HD Greaseable Ball Joint made to OE size featuring a heat-treated chromoly ball stud and seat, these UCAs have been designed with an increase of three degrees over OE caster & camber corrected in the UCA, making them perfectly suited to lifts of 25-100mm.

Rubber OE spec bushings keep NVH under control and easily serviceable. Dual coatings with E-coat for corrosion control with a high-gloss industrial powder coat finish for durability keeps them looking great for years to come.

A stand out feature of the Blackhawk UCAs is they are "ADR compliant", meaning they have been designed, tested and documented to comply with the NCOP VSB14; this makes engineering to have them completely street legal a very easy process.

**6MM DOM WALL THICKNESS**

**HI-ANGLE HD GREASEABLE BALL JOINT**

**RUBBER OE SPEC BUSHINGS**

**ADR COMPLIANT**

**PART NUMBER UCA4981N**

**BARCODE 9319478665583**

\*Some states require UCA engineering to be completed prior to GVM presentation as the vehicle needs to be in RWC state.
